

European Computer Driving Licence

The European Computer Driving Licence (ECDL) is an internationally recognised qualification, available in over 125 countries. ECDL is designed to give anyone a chance to improve competency and confidence across a range of IT skills.

ECDL is motivational, flexible, and fun, and is suitable for any learning level - you could be a computer novice and still be able to build necessary skills and gain a qualification. ECDL works as a stepping stone towards your career path by improving computer speed and efficiency and by providing vital IT skills.

Case Study

A study of Manchester NHS Agency with 18,500 staff of different literacy levels, using a blended learning solution including ECDL, showed the following results:

- Staff morale increased from 65% to 83% after ECDL.
- The average time saved by staff was 38 minutes a day, equalling 3 hours per week.
- The Agency had a return on investment of 162%, based on the time saved by employees with an average annual salary of £15,000.
- Before using ECDL, 44% of staff asked for help several times a week - after, less than 10% asked for help at all.
